Shopping is a necessary part of life which very few people can avoid. Some people go shopping more regularly than other people to browse products in shops even when they do not have much money. This is known as window shopping and allows people to plan ahead and save for the things they want to buy in the future or wait for the items to drop in price. Some people spend a lot of time looking for bargains while others do not think of the price and are happy to spend a lot. Some people believe that the more expensive the item, the better the quality, but this is not always true. It is sensible to buy items which are **affordable**, but some people use a credit card or borrow money from the bank so that they can buy the items they really want rather than wait for it.

Sometimes shopping can be stressful when choosing a gift to buy for other people for a special occasion. People are able to order their necessary and luxury items from the comfort of their own home, or even on the move. Delivery is usually free and items are often cheaper than in shops on the high street. The only real problem is that the item description and quality may be more different than what they hoped for. This could mean the customer may become disappointed with the item they receive and will need to return it at their own cost. People who go to shops to do their shopping often use self-service payment machines. This usually saves time as the shopper does not need to join a long queue.
