What jobs will be popular in Vietnam in the future?

1. Read and fill in the blanks.

FOCUS ON: Future jobs

I go to Nguyễn Du Primary School in Hanoi. We learned about future jobs this week in my science class. My teacher said we'll need new medicines. Chemists will help us make new medicines, so I think many people will be chemists in the future. I think being a chemist sounds really cool. I also think many people will be biologists. Biologists will help people understand how new medicines can help them stay healthy. I think biologists, chemists, and other scientists will help us learn many new things about the world around us. We still have a lot to learn about plants and animals. I think there will be many exciting things to learn in the future.
